# Welcome message

**Dear Fellow Embryologists and reproductive medicine specialists,**

On behalf of Rajasthan Chapter of Indian Society for Assisted Reproduction (ISAR) and Pink City Jaipur, it is our great pleasure to invite you for 4th National Conference on Embryology on 01st-02nd December, 2018 at The Lalit Jaipur, Rajasthan.

The world's first IVF baby was born in 1978 in the UK, more than 8 million babies have been born worldwide where embryology plays important role in IVF outcomes. We are witnessing an alarming increase in infertility and so the increase in number of IVF cycles. A continued rise in the rate of successful pregnancy for each IVF attempt making more competent clinics and creating more smiles. We as a community of fertility specialists do get immense satisfaction bringing smiles to millions of couples struggling with infertility.

Advances in technology require continuous re-evaluation, revision of old techniques and implementation of new methodologies. Embryology needs to be revolutionized for breed of young, over-enthusiastic embryologists to be updated, made aware of Glitches, Pitfalls and Dilemmas. Keeping the vision in forefront, a novel idea to bring together worldwide professionals to share their experience far beyond theoretical illusions.

Indian Society for Assisted Reproduction (ISAR) being the pioneer body is working since 28 years to bring reproductive scientists on one common platform. We are privileged to host 4th ISAR Embryology conference with many exciting scientific events and cultural extravaganza. This conference is aimed to stage the finest amalgamation of science and technology in the new era of IVF at the Pink City Jaipur, one of the Enthralling, Historical and Gateway to India's most flamboyant state.

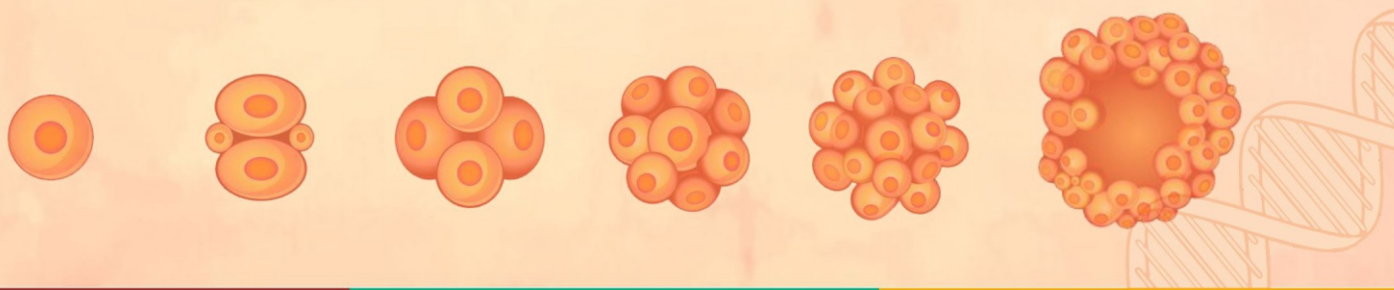

Looking forward to seeing you.
